## TOKYO OEDO METRO CONNECT™ 2.0

### A dark fiber network that seamlessly connects all 10 of Equinix's Tokyo data centers

Equinix has been steadily expanding in Tokyo since the opening of its first International Business Exchange™ (IBX®) data center there in 2002. With the recent acquisition of Japanese data center provider Bit-isle and the opening of the TY5 IBX, it now operates 10 carrier-neutral data centers in the Tokyo metropolitan area.

These facilities are home to over 60 Japanese and international network providers, key internet exchange points, a vibrant cloud ecosystem with direct connectivity to Microsoft Azure and Office 365, Amazon Web Services, Google Cloud Platform and Softlayer, multiple FX matching engines and access nodes as well as an active financial ecosystem.

While these ecosystems are located in different locations across Tokyo, Oedo Metro Connect 2.0 provides a dark fiber network that transforms all Equinix's Tokyo data centers into a metro-wide virtual campus, enabling customers to interconnect regardless of which building they are in, extending their choice and reach. It gives them simple, scalable and secure fiber connectivity to partners and ecosystems across metro Tokyo at the price of an Equinix Cross Connect or roughly one-tenth of a dedicated line.

#### Oedo Metro Connect Monthly Charge

Metro Connect 10G (Unprotected):  
**JPY 35,000 per segment\***  
(excludes tax)

Metro Connect 1G (Unprotected):  
**JPY 35,000 per segment\***  
(excludes tax)

\* A segment refers to the connection between two Equinix data centers in Tokyo

#### Highlights:

- Low-latency, resilient fiber networks that extend network and cloud provider choices
- Tokyo-wide virtual campus that lets customers access partners in any of Equinix's Tokyo data centers
- Eliminate physical capacity constraints at one particular data center
- Accelerate ecosystem development:
  - Financial ecosystem
  - Cloud ecosystem
- Priced the same as an Equinix Cross Connect (i.e. roughly one-tenth of the cost of a dedicated line)

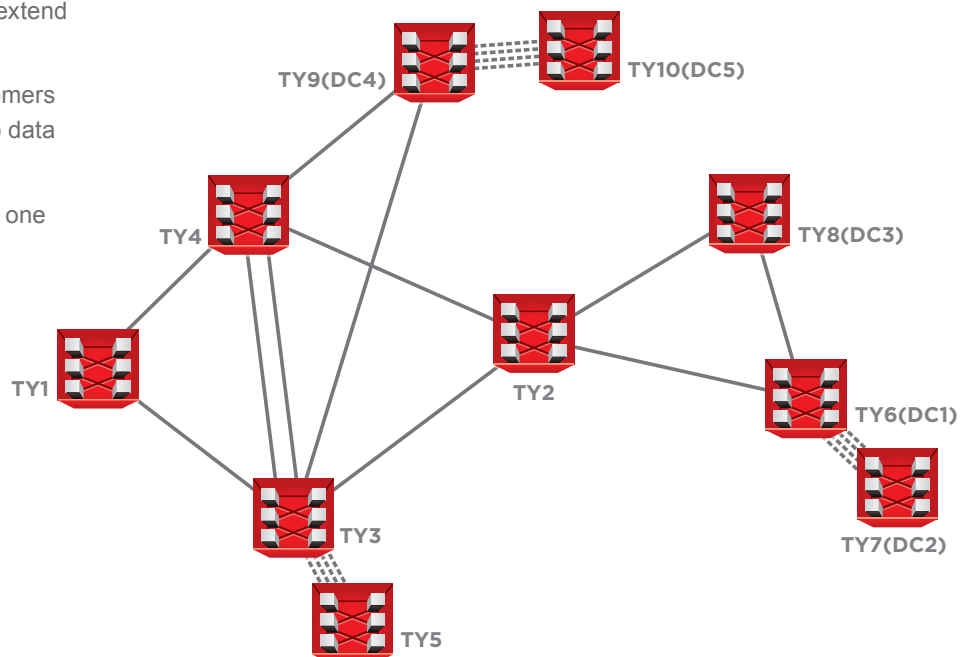

#### Notable clients:

Hitachi, among others
