HYBRID CLOUD MIGRATION

Equinix Professional Services for Cloud (EPS Cloud) migration: helping you boost performance, save costs and improve agility.

Migrating existing applications to the hybrid cloud can help improve your performance, provide immediate cost savings and create greater agility. EPS Cloud makes the migration process simple, seamless and stress-free. We use a phased approach to ensure that business and compliance requirements are delivered, risks are mitigated and financial targets are met. In addition, a migration with EPS Cloud is specifically designed to have little or no impact to ongoing operations.

EPS Cloud combines the Lift and Shift and Greenfield migration methodologies to create the ultimate solution for your existing environment and objectives. Lift and Shift requires limited configuration and is the fastest way to migrate to the cloud; while Greenfield offers complete customization, uses the latest technologies and application updates and optimizes performance.

Migration Options

Lift and Shift - Using the Lift and Shift methodology, EPS Cloud migrates your application to the cloud without any code changes.

With this option, you're able to map much of your existing infrastructure to the cloud on an as-is basis, making this approach ideal for:

- Data center retirement
- Data center consolidation
- Divestiture/M&A
- DR/HA site relocation

Hybrid Cloud Migration

Greenfield - Using the Greenfield methodology, EPS Cloud creates an architecture that can take full advantage of cloud-deployed applications while balancing other objectives like security, cost and performance.

The cloud is constructed from scratch, isolated from existing infrastructure and engineered to maximize cloud capabilities.

This approach is ideal for:

- Newer applications
- Added sites/businesses
- New DR sites

Included in Your Migration:

- A detailed and customized migration roadmap; including timeline, required resources and actionable items.
- Seamless and secure connectivity established with on-premises data and applications. This includes proprietary tools and partner technologies to move your workloads to the target cloud platform.
- Complete cost transparency and defined deliverables to minimize risk and maximize your return.
- Systematic testing of applications and services; as well as project documentation, training and knowledge transfer for your environment. Helping Clients Reap the Benefits of the Hybrid Cloud.

About EPS Cloud

Equinix Professional Services for Cloud (EPS Cloud) provides enterprise hybrid cloud solutions and migration services, helping enterprise organizations adopt and integrate cloud technologies.

In partnership with cloud platform and product industry leaders, EPS Cloud delivers end-to-end capabilities to help enterprises build scalable, highly available, resilient, cost-efficient and secure interconnected cloud environments.

By continually providing superior hybrid cloud solutions to satisfy business objectives, simplifying IT management and meeting security and compliance requirements, EPS Cloud has become a trusted partner to CIOs of some of the world's largest organizations.

“We had an obligation to deliver a functioning, operational infrastructure to the buyer. We also had an obligation to Hess to make sure that infrastructure could be handed off in short order, both legally and physically. Using the cloud enabled us to meet all of these requirements and we are thrilled with the results.”

Jim McDonald, Lead Architect at Hess

“By relying on cloud technology and the expertise of EPS Cloud, we benefitted from an upgrade that increased our business process in a positive manner.”

Reji Matthew, Executive Senior Director, YES Network
